Drawings

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the proper label or legend corresponding to all blocks or numbers as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2621

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukutani (US Pat. No. 6, 038,431).

Regarding claim 3, Fukutani discloses an audio and video combined apparatus wherein a housing includes a DVD deck, a video cassette deck, a DVD operating device, a video cassette operating device and a power device, both of said operating devices and said power device are mounted on at least one double-sided board (see figs. 10, 19A), said double-sided board mounting said DVD operating device is provided between said housing and said video cassette deck, and a circuit generating a noise in said DVD operating device is positioned below said video cassette deck, and is surrounded by a conductive panel of said housing and a conductive chassis of said video cassette deck and is thus shielded electromagnetically (see figs. 8, 17, 19A, and col. 6 lines 49-col. 7 line 16, col. 16 lines 1-24, col. 19 lines 55-67 and col. 22 lines 23-32).

Claims 1 and 2 are rejected for the same reason as discussed in claim 3 above.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
